-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This communication is responsive to your preliminary amendment filed 12/27/04. Claims 1-32 are currently pending in this application. Claims 33 and 34 have been canceled.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

3. The drawings are objected to because all rectangular boxes in Fig. 1-7 should be labeled with wording such as "coil", " comparator", "tuner" etc. The use of reference numerals in the boxes, is insufficient. See 37 CFR 1.83. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If

the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The abstract of the disclosure is objected to because the abstract provided is that for the corresponding PCT application and does not conform to US practice. The abstract should be in a separate page. Correction is required. See MPEP § 608.01(b).
5. The disclosure is objected to because of the following informalities: There is no brief description of figures 10 and 11 (page 13 of the specification). There is also no brief description of Fig. 12 and this drawing figure is missing altogether. However, the specification refers to this figure at page 15 line 6.

Appropriate correction is required.

Allowable Subject Matter

6. Claims 1-23 and 25-32 are allowed.
7. The following is a statement of reasons for the indication of allowable subject matter: The prior art considered does not disclose nor fairly suggest, a NQR scanner/method having in combination a pulse generator, a high power amplifier, a high Q tunable coil, a power matching unit, an electromagnetic shield, a tuning subsystem, an ESR switch, a receiver, a processor, an isolator, a comparator and a detector as claimed.

Claim Rejections - 35 USC § 112

8. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 24 is in error as it depends from claim 1 an apparatus claim, while making reference to a method.

9. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wilker et al., Skatter et al. and Mann all disclose NQR scanners. Note the abstract of each disclosure.
